

PYRAMID

vegetable printing

Save your left-over vegetable bits! You can use them for printing.

These are the thick stalks of broccoli.

Apply paint to the end of the stalk.

Use a brush to paint it on, or dip it in paint.

Press the stalk onto your surface.

You could use paper, or the inside of a cereal box.

Lift the vegetable off the surface to reveal the pattern.

Look at the other end of the broccoli stalk.

Have a go at printing with this and see what shape it makes.

Add paint to the surface.

This is done with a sponge dipped in paint but you could use a brush or dip it directly into the paint.

Press down onto the surface.

Then lift it up to see what shape you've made.

This picture was made by doing a few prints and then colouring in with felt pens.

You can use this technique for other vegetables or objects you find, or leaves and flowers.

Finished? Take a photo and email it to info@pyramid.org.uk.

We will add it to our Pyramid Post online gallery.
